

Which communication interfaces are compatible with a mobile BESS?

The investigation compares the identified communication interfaces and their respective applicability to a mobile BESS, specifically the VMS.

For specific power utility applications, it is clearly noted that the standard IEC 61850 allows clear benefits compared to the other investigated interface.

How much power does a BESS have?

The system is built of two main blocks.

The PCS building block, responsible for the main control of the mobile BESS.

The nominal power rating of the PCS block is 225 kVA, with a maximum peak power in the peak shaving mode of 275 kW.

The second block is the modular battery pack.

What is BESS CX-CI002?

Advanced liquid cooling technology; Widely used in large C&I energy storage systems; Meets power demand regulation and peak shifting.

Outdoor Cabinet BESS CX-CI002 is an all-in-one 215kW lithium battery storage cabinet system specifically developed for demand regulation, peak shaving, industrial and commercial energy storage, etc.

Why should you choose a BESS energy storage system?

The mobility and flexibility of the system enables novel applications and deployments where BESS previously were unused due to the non-flexible solutions.

The system is modular, meaning that the energy storage capacity can be quickly adapted depending on the application case, in contrast to larger and bulkier solutions.

Is IEC 61850 suitable for a mobile BESS?

For specific power utility applications, it is clearly noted that the standard IEC 61850 allows clear benefits compared to the other investigated interface.

Exploring the standard further, a basic data model and system integration is developed to document the suitability of the standard on a real mobile BESS.

How a BESS coordination scheme can be used for interoperable mobile System DER?

Accommodating novel and state-of-the-art BESS coordination and protection capabilities.

Furthermore, such a coordination scheme could be utilized to effectively connect multiple VMS and other mobile BESS in an effective manner, for an interoperable coordinated mobile system DER.
